

Expanding the scope of GI

Bravo[®] pH Patient Diary

Patient Instructions

The purpose of this pH study is to monitor the frequency and duration of gastric reflux during a normal day. To get the most accurate results, you must eat, drink, work, and exercise as you normally would.

DO NOT take any antacid or antireflux drugs during your study unless instructed to do so by your physician. If in doubt, contact your physician.

Recording Events in the Patient Diary

On the Patient Diary sheet, record events. Make sure to write down the starting and stopping times, using the time displayed on the Receiver.

	Meals	includes snacks
	Sleep	includes lying down
	Other	includes sports and other activities

Recording Symptom

Symptoms include heartburn, regurgitation, and chest pain.

Write them down on the Patient Diary sheet **OR** record them automatically by pressing the appropriate symptom button on the Receiver.

Symptom Button	Symptom
	The green indicator light turns on for 3 seconds and a beep is heard (if this feature is turned on). This tells you that the symptom was recorded.

Receiver Out of Range

If the Receiver is too far from the Bravo Capsule, a beep will be heard for 30 seconds and the display will flash C1 or C2. Move the Receiver to your breastbone until the beep stops and the C1 or C2 is no longer visible.

If you have **914-734-8224 or 845-278-1600** study, call _____.

At the completion of your pH study, return the Bravo pH Receiver and your diary to the Endoscopy/GI Lab at:
